

How to Submit your Client for the Real Steel role “MAX” on ActorCast

Use www.realsteelcasting.com to get all the information on the role and to submit.

If you do not already have a talent rep account on ActorCast, you will be prompted to sign up, if you do have an account, you will log in (*please note that your name and email may already be in the system because a client or casting office identified you in ActorCast as a talent rep, in which case you can request your password, log in and complete your account set up).

Add your talent to your roster by selecting “add actor” from the profile or talent pages. You will need to enter account info for the actor including an email and password, even if that actor does not intend to log in. As a Rep, **only your contact information will be available to casting**. At the bottom of the add actor page, select the option: I will be completing the activation for the actor (by promo code or payment) Enter the code: **REALST** to complete the free video sign up.

Complete a profile for the actor, and then **upload photos and resume** on the “photo” and “resume” pages.

Since you are submitting an audition, you will need to **add video**. Once the audition file is ready, upload it to your client’s profile using the “video” page.

*If your client was already a member of ActorCast but did not have video capabilities, you will need to click “upgrade” to premium from the video page. You can enter the **REALST** promocode on the payment page to upgrade your client for this submission at no charge.

Build a package on the “packages” page. Select the photo, resume and video you wish to use for this submission and name the package. You may notice the ACMessenger option on this package page. You do not need to use that feature for this submission. **You will be submitting from the Roles page**.

Repeat the steps above for any additional clients

Submit on the Roles page. Find the role of MAX on the roles page and click “next” and select the client and package you wish to submit. Then click “submit package” and you are finished.

Your client’s package will be placed directly into the casting office’s Cast It system for the casting office’s review.

**Please contact support@actorcast.com with any questions or issues. You can provide a phone number and someone will get back to you. Please do not contact the casting office with questions about the submission process, we will be happy to help you at ActorCast.
